BETTER WORLDS START WITH GREAT MOTHERS.

AND GREAT MOTHERS START WITH US

Nurse-Family Partnership
Helping First-Time Parents Succeed®
Better Worlds Start With Great Mothers

Every day, hundreds of children in America are born to first-time mothers living in poverty who face seemingly insurmountable challenges, like homelessness, substance abuse and intimate partner violence. And the first 1,000 days of a child’s development are a vital window of opportunity—for all families, but particularly these families—in which we can have a lasting impact.

**Nurse-Family Partnership was founded in 1977. Since 1996 we’ve supported more than 270,000 families.**

Nurse-Family Partnership® is an evidence-based, community health program that serves first-time mothers and their families living in poverty. By awakening the caretaker within each mother, we are able to improve healthy brain development and school readiness in children, prevent child abuse and neglect, strengthen and empower families and break the cycle of poverty.

“**When I was overwhelmed and unsure, my nurse was my lifeline.**

Program Graduate”
Great Nurses Strengthen Families

Our highly trained nurses give expectant women valuable knowledge and support throughout pregnancy until their child reaches two years of age. Each Nurse-Family Partnership nurse is specially trained to deliver our unique program—the original model, developed by David Olds, Ph.D., remains at the core of the program today. The partnership between a nurse, a mother or family and the child is a winning combination, and this relationship of trust makes a measurable difference for the whole family.

OUR GOAL IS TO SERVE 100,000 FAMILIES ANNUALLY BY 2023
Great Mothers Start with Us

We are committed to transforming the lives of mothers, children and families by investing in motherhood. Nurse-Family Partnership creates positive outcomes in numerous ways, including:

1. Providing health care and support while delivering positive pregnancy outcomes, including a decrease in pre-term births, a decrease in tobacco and drug use, healthier diets, decreased hypertension and other preventative health practices.

2. Supplying the tools to improve child health and development by helping parents provide responsible, competent and nurturing care for their children.

3. Empowering families to be economically self-sufficient by helping parents develop a vision for their own future, plan future pregnancies, continue their education and find work.
We Are The Gold Standard

More than 40 years of scientific studies have consistently proven that we succeed at our most important goals: keeping children healthy and safe, and improving the lives of moms and babies.

- **48% Reduction in Child Abuse and Neglect** *
- **67% Less Behavioral and Intellectual Problems in Children at Age 6** **
- **72% Fewer Convictions of Mothers (measured when child is 15)** *

According to a 2005 RAND Corporation study, every $1 invested in the highest-risk families participating in Nurse-Family Partnership returns $5.70
Strong Families Start With Us

The Nurse-Family Partnership program has supported thousands of at-risk young women across 42 states, the U.S. Virgin Islands and some Tribal Communities.

Our program is scientifically proven to awaken the caretaker within mothers, strengthen families and break intergenerational cycles of poverty.

We believe that creating better worlds starts with great mothers, and we know these mothers need your support. Join us in creating safe, strong, and thriving families across America.

Our Vision: A future where all children are healthy, families thrive, communities prosper and the cycle of poverty is broken.
