

Submittal package must include the following:

- Tacoma-Pierce County Health Department Public Well Application.
- Clearly mark the well site location with a flag or stake.
- Map showing clear directions to the site.
- Two copies of the site plan showing:
 - Dimensions of the parcel where the well is located.
 - All proposed and existing wells on the parcel and within 100 feet of the parcel boundary.
 - Circle centered on the well showing a 100-foot non-pollution well radius.
 - Septic tanks and drainfields on site, and location of neighboring septic systems if the 100-foot well radius extends onto adjacent parcels.
 - Measurements from the well to building structures, septic systems and property lines on the parcel.
 - Other features, including surface water, springs, pastures, sewer lines, easements and kennels.
 - Areas containing stock animals (i.e., fenced areas for horses, cows or other animals).
 - Map showing location of proposed parcels and buildings connected to the water system.
- Critical Area Checklist from Pierce County Planning and Land Services (PALS) or <https://palsonline.co.pierce.wa.us/palsonline/#/AboutMyProperty>
Tacoma-Pierce County Health Department recommends you review your critical area checklist for the following Indicators: wetland, flood zone and landslide erosion. Addressing these issues in conjunction with the application process can save valuable time. For wetland issues please contact the Biologist-of-the-day at (253) 798-7005. Other indicators can be addressed by contacting Pierce County Development Engineering at (253) 798-3749.
- Copy of the recorded formal or short plat.
- A “Restrictive Covenant” from the neighboring property owner is required if the 100-foot protective radius overlaps any part of an adjacent property.
- Preliminary agreement with a Satellite Management Agency (SMA). Final agreement required before water system approval.

Water Right requirement

- All proposed Group A wells and Group B wells with more than 6 connections must obtain a water right from Department of Ecology.
- New Group B wells less than 6 connections must comply with Pierce County PALS Policy DW2016-02 requirement for a hydrogeologic study.
 - This application will be placed on hold until you satisfy Pierce County PALS requirements.
 - Contact Cory Ragan, (253) 798-2590 or Michael Jimenez, (253) 798-7181 at Pierce County PALS for further information.

Additional requirements

- All wells proposed as a drinking water supply must meet siting requirements (WAC 246-290 and EH Code Chapter 3.
- All wells proposed as a drinking water supply must meet construction requirements (WAC 173-160 and EH Code Chapter 3.
- Once siting and construction has been met, a Group B Design Report must be submitted for review and approval to the Health Department.

Please call us at (253) 798-6470 (option 2) or email EHDrinkingWater@tpchd.org with any questions.
